**SAVE THE DATE**

*Write Winning Grants Workshop*

Do you want to be a successful grant writer?

Plan now to attend this full day grant writing course featuring Dr. David Morrison, Co-Founder and Member, *Grant Writers’ Seminars and Workshops, LLP*

**Thursday, February 10, 2011**  
8:30 a.m. to 4:30 p.m.  
– continental breakfast and lunch provided –

**Target Audience:**  
Veterinary Medicine, FAES, OARDC, OSUE: Faculty, Research Staff, Post docs, and PhD Candidates

Each participant will receive an extensive PowerPoint handout and a copy of *The Grant Application Writer’s Workbook*

$50 registration fee (paid by 100-W or check)

---

**Key Topics**

- Fundamental principles of grant writing to any agency, with USDA-related highlights
- How to develop an irresistible, fundable idea for a grant application
- Tips on how to write for your reviewers
- How to identify the most applicable source of funding for an idea
- How to use the internet to your advantage
- Tips and strategies for resubmitting

**Presenter: David Morrison, PhD**  
PhD from Yale; Post doc research fellow NIH and Scripps Research Institute.  
Continuously funded since the 1970s by NIH (including a ten-year MERIT award), foundations, and industry.  
Member of multiple national review panels and advisory groups.

---

**Primary Workshop Location**  
OSU - Nationwide & Ohio Farm Bureau 4-H Center  
2201 Fred Taylor Dr., Columbus, OH

---

**Seminar Sponsors**

- College of Veterinary Medicine (CVM)  
- College of Food, Agricultural, and Environmental Sciences (CFAES)  
- Ohio Agricultural Research and Development Center (OARDC)  
- OSU Extension (OSUE)

**Questions:**  
Jeff Agnoli  
agnoli.1@osu.edu  
Kate Hayes-Ozello  
hayes-ozello.1@osu.edu

Workbook Options

The Grant Application Writer’s Workbook

National Institute of Health & other public health agencies Workbook (NIH)
The PHS SF424 application format and electronic submission through Grants.gov are now required for most NIH grant applications. Principles and fundamentals of good proposal writing are emphasized in this Workbook, together with tips and strategies that kept the authors continuously funded by NIH throughout their research careers. The Workbook is interactive in the sense that examples are provided after which the reader is asked to make a comparable response in his/her area of research interest. As such responses are made the first draft of the application evolves. Preview: http://www.grantcentral.com/workbook_nih_sf424_shortened.html

NSF Workbook (National Science Foundation)
For those participants interested in submitting to NSF. Principles and fundamentals of good proposal writing are emphasized in this Workbook, together with tips and strategies that kept the authors continuously funded throughout their research careers. The Workbook is interactive in the sense that examples are provided after which the reader is asked to make a comparable response in his/her area of research interest. As such responses are made the first draft of the application evolves. Preview: http://www.grantcentral.com/workbook_nsf.html

Successful Proposals to Any Agency Workbook
The grant applications of most agencies contain basically the same sections – only the specific names for the sections and the order in which they appear in the application are different. In addition, the principles and fundamentals of good proposal writing are the same for all agencies. Given these two facts, we have written a ‘generic’ workbook that can be used to write a proposal to any granting agency. It walks the applicant through the preparation of each section and is meant to be complemented by the specific instructions of the agency that is being targeted. Preview: http://www.grantcentral.com/workbook_otheragencies.html

United States Department of Agriculture Workbook (USDA)
The USDA edition will include an updated insert. The USDA Workbook does not contain specifics about the SF424 format but is accurate with respect to principles and fundamentals needed to complete the sections that must be uploaded into the SF424 forms. The insert guides extrapolation to the new, SF424 approach.
