

Boehringer Ingelheim is an equal opportunity global employer who takes pride in maintaining a diverse and inclusive culture. We embrace diversity of perspectives and strive for an inclusive environment which benefits our employees, patients and communities.

Experimental and Molecular Pathology Summer Intern-1814731

Description:

Boehringer Ingelheim is currently seeking a talented and innovative Intern to join the Non-clinical Drug Safety department located at our Ridgefield, CT facility. As an Intern, your project will support the Experimental and Molecular Pathology groups by utilizing image analysis approaches in the evaluation of histologic specimens. By integrating histopathology with current imaging techniques, this project will support development of new biomarkers for safety decisions. This experience is designed for a veterinary student who has taken at least introductory courses in anatomy, histology, and pathology or has equivalent practical experience, and has an interest in pursuing post-DVM training in anatomic or clinical pathology and/or PhD work upon graduation. During this internship you will have the potential for interaction with our laboratory animal veterinarians as well as other veterinarians and pathologists working in a diverse array of positions within the company. This summer internship is also open to eligible veterinary students undertaking concurrent dual-degree programs, such as DVM/VMD-PhD and DVM/VMD-Masters.

As an employee of Boehringer Ingelheim, you will actively contribute to the discovery, development and delivery of our products to our patients and customers. Our global presence provides opportunity for all employees to collaborate internationally, offering visibility and opportunity to directly contribute to the companies' success. We realize that our strength and competitive advantage lie with our people. We support our employees in a number of ways to foster a healthy working environment, meaningful work, diversity and inclusion, mobility, networking and work-life balance. Our competitive compensation and benefit programs reflect Boehringer Ingelheim's high regard for our employees.

Duties & Responsibilities:

- Histologic evaluation of normal and pathologic sections of tissues
- Assess original glass slides for tissue anatomy, tissue quality, tissue artifacts
- Responsibility for generating scanned images for image analysis
- Assist with on-going immunohistochemistry and in situ hybridization
- Collaborate with veterinary pathologists in developing image analysis approaches to support drug safety projects
- Develop understanding of veterinary pathology as it relates to the development of pharmaceutical products
- Read, understand and follow standard operating procedures and instructions

Requirements:

- Must be a Professional Student in a veterinary medical degree (DVM, VMD) program in good academic standing.
- Must have completed 12 credit hours within a related major and/or other related coursework.
- Overall, cumulative GPA (from last completed quarter) must be at least 3.000 (on 4.0 scale) or better (no rounding up).
- Major must be related to the field of internship.

Desired Experience, Skills and Abilities:

- Minimum of two years attendance at an AVMA accredited veterinary medical college
- Completion basic school curriculum course work (anatomy, histology, pathology) relevant to program year
- Previous experience with immunohistochemistry (IHC) techniques desired, but not required
- Work professionally with laboratory scientists and histotechnologists
- Ability to perform basic statistical calculations and interpret data
- Familiarity with Microsoft Office software packages
- Excellent written and oral skills

Eligibility Requirements:

- Must be legally authorized to work in the United States without restriction.
- Must be willing to submit to a background investigation, including verification of your past employment, criminal history, and educational background
- Must be willing to take a drug test and post-offer physical (if required)
- Must be 18 years of age or older

Who We Are:

At Boehringer Ingelheim we create value through innovation with one clear goal: to improve the lives of patients. We develop breakthrough therapies and innovative healthcare solutions in areas of unmet medical need for both humans and animals. As a family owned company we focus on long term performance. We are powered by 50,000 employees globally who nurture a diverse, collaborative and inclusive culture. Learning and development for all employees is key because your growth is our growth.
